

New Zealand Certificate in

# Competitive Systems and Practices Level 3

**Competitive Systems and Practices (CSP) is a suite of qualifications designed to give people within your organisation the skills and knowledge they need to devise and implement more productive and competitive ways of working.**

**These qualifications draw focus on improving systems and practices, reducing costs and waste, and increasing efficiencies.**

**Cost and time savings add to your profit margin. The learning outcomes of CSP can be applied to any process, in any industry.**

## What's in it for your business?

CSP is about learning to question existing methods and continuously seek opportunities for improvement.

The beauty of CSP learning is that the improvements your people discover are to the context of your business and able to be implemented in your day to day operation immediately.

Workplace-based CSP qualifications deliver increased profitability and sustainability (cost and waste reduction), as well as complementing and maintaining your people's core skills of continuous improvement and problem solving.

*Ask your hiring manager how you and your fellow team members can get started today.*

**For more information or to enrol, call 0800 LEAN HUB or email [discover@theleanhub.co.nz](mailto:discover@theleanhub.co.nz)**
